

LENSEN DEGIFE

Computer Science Student

Summary

Computer Science student at Addis Ababa University with strong interest in web development and software engineering. Experienced in building web and desktop applications using Java, Spring Boot, Python, and modern web technologies. Passionate about problem-solving and developing real-world solutions. Seeking an internship to apply technical skills and gain industry experience.

EDUCATION

Bachelor of Science in Computer Science

Addis Ababa University (AAU)

2024 - 2029

Addis Ababa, Ethiopia

SKILLS

Technical Skills:

- Programming: Java, Spring boot, C++, Python, JavaScript
- Web: HTML, CSS, JavaScript
- Database: MySQL, SQLite, Microsoft SQL server
- Tools: Git, GitHub, IntelliJ IDEA, Visual Studio

Soft Skills:

- Problem-solving
- Team collaboration
- Time management
- communication

PROJECTS

Full-Stack E-Commerce Application

Backend: github.com/lensen-degife/ecommerce-backend

Frontend: github.com/lensen-degife/ecommerce-frontend

Developed a complete full-stack e-commerce platform consisting of a robust Spring Boot REST API backend and a modern, responsive React frontend. The application enables product browsing, management, search/filtering, and shopping cart functionality.

Key Features & Responsibilities:

- Backend (Spring Boot): Built RESTful APIs for product CRUD operations, category management, shopping cart, image upload handling, and advanced product search/filtering. Integrated Spring Data JPA with Microsoft SQL Server/H2 database.
- Frontend (React): Created a dynamic and user-friendly interface with product listing, detailed views, add-to-cart functionality, cart modal, and seamless API integration using Axios.
- Implemented responsive design for optimal user experience across devices.
- Configured project structure following best practices (controllers, services, repositories on backend; components, pages, and config on frontend).
- Ensured smooth full-stack integration between frontend and backend services.

Technologies Used:

- Backend: Java 17, Spring Boot 3, Spring Data JPA, Maven, MySQL / H2
- Frontend: React 18, JavaScript (JSX), Axios, React Router, CSS

This project demonstrates end-to-end development skills in building scalable web applications, from API design and database integration to frontend UI/UX and client-server communication.

Cafe Management System

- Developed a Java-based desktop application to manage cafe operations, including orders and user authentication
- Implemented structured data handling and improved system usability
- Technologies: Java, MySQL
- GitHub: <https://github.com/lensen-degife/CafeManagementSystem>

Shop Billing System

- Developed a C++ application to manage product sales and generate itemized bills
- Implemented transaction handling, price calculation, and structured billing logic
- Designed efficient control flow to ensure accurate and reliable billing operations
- Technologies: C++
- GitHub: <https://github.com/lensen-degife/shop-billing>
