TECHNICAL SKILLS

- **Languages**: Java, JavaScript, Python, C++, SQL
- **Frontend**: React, HTML, CSS, Tailwind
- **Backend**: Spring Boot, Node.js / Express, REST APIs, JWT
- **Databases**: MySQL, PostgreSQL, MongoDB, Microsoft SQL Server
- **Tools**: Git, GitHub, Docker, Vite, Maven, Expo

PROJECTS

Study-Support AI Agent checkout

- Live Demo: https://study-support-ai-ivory.vercel.app
- Developing an AI-powered academic tutoring platform designed to deliver syllabus-grounded learning assistance and eliminate hallucinated course guidance.
- Building a responsive React web application with features for diagnostic assessments, mastery analytics, and automated remedial study plan generation for missed concepts.
- Developing secure Node.js and Express backend services with deterministic code-level grading, brute-force rate limiting, and dual-mode PostgreSQL persistence on Neon.
- Designing a strict anti-AI quiz lockdown engine featuring forced fullscreen, tab-switch telemetry, clipboard copy-paste shielding, and automated integrity audit scoring.

StockFlow Lite – Inventory Management System checkout

- Live Demo: stockflowlite.vercel.app
- Built a full-stack inventory management application designed to simplify product and order management.
- Developed a responsive frontend using React and Tailwind CSS.
- Implemented RESTful backend APIs with Node.js and Express.
- Integrated PostgreSQL for persistent data management and implemented user authentication.

HydroLink – Water Utility Management System checkout

- Developing a mobile-based water utility management application designed to improve access to water services and communication within local communities.
- Building a React Native mobile application with features for water payments, service announcements, water schedules, and problem reporting.
- Developing backend services using Node.js and TypeScript to support application functionality and user operations.
- Designing features for meter-reading management and integration with local payment methods, including Telebirr and CBE.

EDUCATION

Addis Ababa University | B.Sc. Computer Science | 2024–2028

HACKATHONS & ACTIVITIES

- **Vision Vertex × ISHUB Hackathon** – Participated in collaborative software development and problem-solving.
- **IDEEZA Hackathon** – Collaborated on developing frontend and backend features for web applications.
- **ISHUB Summer Camp** – Participated in hands-on software development training and team-based projects.
