EDUCATION

Bachelor of Science in Computer Science

Addis Ababa University (AAU)

2024 - 2029

Addis Ababa, Ethiopia

SKILLS:

- **Frontend**: React, Vite, TypeScript, Tailwind CSS, HTML, CSS
- **Backend**: Node.js, Express, Spring Boot, Java, Python, C++
- **Database**: PostgreSQL, MySQL, MongoDB, SQL Server
- **Mobile**: React Native, Expo
- **Cloud & Tools**: Render, Vercel, Git, Linux (Ubuntu)

Summary

Third-year Computer Science student at Addis Ababa University specializing in full-stack web and mobile development. Experienced in engineering end-to-end applications using React, Node.js, Spring Boot, and PostgreSQL in an Ubuntu Linux environment. Adept at designing RESTful APIs, managing relational and NoSQL databases, and building responsive, user-centric interfaces. Seeking a full-stack software engineering internship to build scalable, data-driven applications.

Projects

HydroLink | Full-Stack Water Management System

- Developed a comprehensive water management system integrating a cross-platform mobile frontend with a robust enterprise backend.
- Built the mobile user interface utilizing React Native and Expo for seamless user experience across devices.
- Engineered RESTful APIs utilizing Spring Boot and Java to process core business logic and client requests.
- Designed and optimized the relational database schema in MySQL to ensure reliable data storage and high-performance querying.

Full-Stack E-Commerce Platform

- Developed a complete full-stack e-commerce platform consisting of a robust Spring Boot REST API backend and a modern React frontend.
- Built RESTful APIs for product CRUD operations, category management, shopping cart, and image upload handling.
- Integrated Spring Data JPA with a Microsoft SQL Server database for secure transaction and product data management.
- Created a dynamic UI featuring detailed product views, a cart modal, and seamless client-server integration using Axios.

StockFlow Lite | Full-Stack Inventory Management

- Architected and deployed a stock management web application featuring secure backend authentication and RESTful order processing endpoints.
- Developed a dynamic, responsive frontend user interface utilizing React and Tailwind CSS.
- Implemented the server-side architecture using Node.js and Express, integrated with a PostgreSQL database for scalable inventory tracking.
- Managed seamless cloud deployments, hosting the backend services on Render and configuring frontend builds on Vercel.

Product Service API | Backend Microservice

- Designed and deployed a standalone RESTful API service using Spring Boot and Java.
- Configured API routing, error handling, and data persistence to support modular, microservice-based architectures.
